PROFESSIONAL SUMMARY

Senior Product Manager with 9 years of experience driving product strategy, roadmap prioritization, and cross-functional stakeholder management across fintech and automotive sectors. Led 15+ loan and credit products on platforms with 20M+ monthly active users. Deep expertise in human-centred design thinking, agentic AI workflows, A/B experimentation, and data-driven product development. Proven track record of delivering outcomes aligned with P&L growth, regulatory compliance, and user experience excellence.

CORE COMPETENCIES

Product Strategy & Roadmap | Stakeholder Management | Cross-functional Leadership | OKR-driven Execution
Human-Centred Design Thinking | Agentic AI Workflows | GenAI API Integrations | A/B Testing & Experimentation
Product Discovery & User Research | Journey Mapping | Go-to-Market Strategy | Regulatory Compliance (FinServ)
Account Aggregator (AA) Frameworks | KYC & eKYC | First Principles Thinking | Agile / Scrum | Google Analytics | Clickstream Analysis

WORK EXPERIENCE

Bajaj Finance Limited — Digital Platforms

November 2021 – Present

Senior Product Manager

- **Led product strategy and roadmap** for 15+ unsecured and secured loan products including account aggregator (AA), KYC, mandate, and e-agreement PODs, driving high funnel conversion and smooth operational flow across 20M+ MAU platforms.
- Partnered with **IDEO and Gradient Design** to embed **human-centred design thinking** into new product development — facilitated discovery sprints, journey mapping workshops, and concept validation for next-gen lending and savings propositions.
- **Led a 247-keyword CX audit of Insite search** via Playwright instrumentation; surfaced 7 systemic friction patterns (intent-match, vernacular, content-strategy). Landed at SVP; elevated search to a chartered product priority.
- Spearheaded **150+ A/B tests and 50+ user research studies** to validate product hypotheses, contributing to a yearly revenue increase of Rs. 1,500 Crores through improved funnel conversion and user retention.
- Delivered **C-suite presentations** and strategic initiatives to enhance financial inclusion, regulatory compliance, and transparent user journeys — actively removed dark patterns to build customer trust.
- Collaborated with **international analytics platforms** (Medallia, ContentSquare) to integrate VoC insights and clickstream data, achieving a 10% increase in user satisfaction scores.
- Conceptualized and launched AI-driven customer support tools including chatbots and virtual assistants, improving customer engagement and reducing support load.
- **Manage a 10-person team** — product managers, designers, analysts, UX writers.
- Negotiated scope and sequencing directly with tech leads in weekly summits — **traded off engineering effort against expected CRO lift, cut features that didn't move the metric, and defended the ones that did through CAT sign-off.**

Tata Motors — Engineering Research Centre

August 2017 – October 2021

Product Manager

- Owned end-to-end product vision and roadmap for RMDV2, an **IBM-powered SAAS platform** to digitalize automobile product development — reduced time to market by 30%.
- **Led shift from specification-driven to experience-driven requirements**, applying JLR practices via Warwick University partnership — reframed how engineers wrote briefs ("progressive, confident pedal feel" vs "X force stopping distance").
- Established **agile delivery cadence** with bi-weekly sprints, increasing development output by 30% and reducing average bug resolution time by 25% within the first quarter.

- Conducted extensive market research and stakeholder discovery across 50+ developers, translating requirements into user stories, acceptance criteria, and prioritized backlogs.
- **Maintained and reported on KPIs** including user engagement, bounce rates, and feature adoption to drive continuous iteration and refinement.

KEY ACHIEVEMENTS

- Rs. 1,500 Crores incremental yearly revenue attributed to A/B experimentation and UX optimization programme at Bajaj Finance.
- 15% reduction in user error rates through journey mapping and micro-interaction redesign.
- 30% time-to-market improvement via digital product development platform (RMDV2) at Tata Motors.
- Gold Medal — Tata Motors Imagineering Innovation Challenge (2019).
- Gold Medal — Tata Innoverse Crucible Hackathon (2020).
- Bajaj Finance 'Superheros' Award (2022) and Bajaj Finserv 'Heroes' Award (2023, 2024 & 2025).

TECHNICAL & DOMAIN SKILLS

Product Management: Roadmap planning, OKR frameworks, product discovery, backlog management, go-to-market, feature prioritization

AI & Emerging Tech: Agentic workflows, Claude code, LLM product design, React prototyping, prompt engineering

Design & Research: Human-centred design thinking (IDEO, Gradient), journey mapping, usability testing, A/B testing, VoC research

FinTech Domain: Account aggregator (AA), KYC/eKYC, loan origination, mandate, e-agreements, financial inclusion, regulatory compliance

Analytics & Tools: CRO, Google Analytics, Clevertap, Medallia, ContentSquare, clickstream analysis, cohort analysis

Methodologies: Agile/Scrum, first principles thinking, design thinking

EDUCATION

National Institute of Technology, Tiruchirappalli (NIT Trichy)

2013 – 2017

Bachelor of Technology — Mechanical Engineering

CONFERENCES & PROFESSIONAL DEVELOPMENT

- Global Fintech Fest 2023 — Jio World Convention Centre, Mumbai
- Actively pursuing HFI Certified Usability Analyst (CUA) certification
